

# vRAD OVERVIEW – GET TO KNOW US

**Our mission is straightforward: to help clients make better decisions for the health of their patients – and the practice of radiology.**

### vRad is a radiology group

We are the nation’s leading radiology practice – and a global telemedicine company – passionate about improving patient care. We deliver access to subspecialty radiologists, next-generation technology and evidence-based imaging analytics solutions to measure and improve quality, value and performance. vRad’s patented and proprietary workflow capabilities enable vRad to provide on-demand, 24/7, national coverage across subspecialties, and allow cases to be efficiently addressed by radiologists best positioned to offer an accurate diagnosis. vRad is the only radiology practice with the prerequisite scale to satisfy the requirements of clients of any size or location – globally.

vRad is an affiliate of MEDNAX (NYSE: MD), a national medical group that comprises the nation’s leading providers of neonatal, anesthesia, maternal-fetal and pediatric physician subspecialty services.

### vRad’s practice is led by physicians

Our 350+ U.S. board-certified and eligible radiologists, 75% of whom are subspecialty trained, average 9 years of post-certification experience. The physician team is led by Chief Medical Officer, Benjamin W. Strong, MD (ABR, ABIM), certified in both radiology and internal medicine, with fellowship training in musculoskeletal MRI. Dr. Strong leads a world-class team of medical directors, as well as clinical chiefs; he was just selected by his peers as the “Top Radiologist to Watch” in *Diagnostic Imaging*.

### vRad is a partner focused on quality

We are a trusted source for radiology interpretations because we deliver on our quality commitments – and share insights gleaned from operating with the same sets of challenges and opportunities as those we serve. vRad is proud of the high accuracy rate we have maintained despite increases in volume of studies read – more than 5 million studies annually. Our accuracy has remained noteworthy and consistent with our market leadership position: 99.7 percent.

*“The ED physicians at our hospitals see vRad as an important extension of the clinical care team. vRad’s remote radiologists are just as concerned about patient care, throughput and management as our physicians. That makes the ED happy, and keeping ED docs happy is a good thing.”*

Kenneth Hite, MD, Medical Director, Radiology Consultants of Lynchburg

## VRad is an innovator in telemedicine and analytics

The scale of our radiology practice means that we can – and have invested over \$50 million to – improve physician productivity and speed as well as quality of diagnoses. We have 15 issued patents for tele-workflow innovation; additional patents are pending on data normalization.

VRad is also at the forefront of advancements in imaging data analytics. Our practice has created the industry’s largest centralized database from its non-replicable library of over tens of millions of radiology studies. VRad Analytics is designed to provide evidence-based insights to key decision makers at healthcare systems, hospitals and onsite radiology groups regarding optimal staffing, imaging utilization and clinical outcomes – all to more efficiently manage their radiology service lines and practices.

*“Moving up the value chain... VRad has become a center of excellence in the radiology field, rivaling major academic centers in its contribution to the future of radiology.”*

Forrester Research

### VRad Snapshot
