*v*RAD PEER REVIEW

Let your radiologists focus on patient care – not paperwork

The administrative burden of a peer-review program can be frustrating and overwhelming. You'd rather spend your time on patient care, but the fact is radiologists must participate in a physician peer-review program to meet American College of Radiology (ACR), The Joint Commission and internal hospital requirements.

With *v*Rad Peer Review, our clients' radiologists don't spend precious clinical time overreading reports. Instead, they rely on *v*Rad's independent, unbiased peer-review team of top radiologists who utilize the time-tested processes of our own internal Quality Assurance program – pioneered by *v*Rad in 2004 with over 10 years and 52 million studies of benchmark data.

*v*Rad Peer Review

- Unbiased, third-party review frees your radiologists for billable work rather than paperwork
- Top *v*Rad radiologists use a non-academic, community-care approach to peer review, giving you an objective review and verbal notification if a significant miss impacting patient care is identified
- *v*Rad Peer Review is easily managed online in *v*Rad's Order Management System (OMS) – data is accessible online 24/7 for reporting and analysis:
  - **Peer-Review Reports** (individual case reports)
  - **Summary Reports** by facility, radiologist and modality
- Confidential reports grade the severity, conspicuity and impact on patient care of any discrepancy
- Statistical reports include physician, modality with body part and facility summaries to satisfy accrediting organization guidelines
- Peer-Review committee consists of the Chief Medical Officer, *v*Rad Medical Directors and select subspecialists chosen for superior quality performance

As practices shift to a fee-for-value reimbursement model, the need for evidence-based medicine and complete transparency into quality will be a requirement. Radiologists won't get paid for quality if they can't prove it – and you can't prove it if you don't measure it.

*v*Rad's Standardized Peer-Review Process

- *v*Rad Peer-Review committee member reviews images and the local radiologist's final report for the sole purpose of assessing the quality of the radiology interpretation
- Committee member issues Peer-Review Report within 14 days
- Original interpretation rated on severity, conspicuity and impact on patient care
- Verbal notification made if a significant miss impacting patient care is identified
- Client reports accessible online at any time in *v*Rad's online Order Management System (OMS)

For information on *v*Rad's Peer-Review program, call 800.737.0610 or go to www.vrad.com.
